

Transtem™ Cellular Therapy Software

Experience You Can Rely On

Mediware is a leading provider of specialized healthcare solutions with more than four decades of experience developing and delivering innovative software to improve efficiencies, including the cellular therapy solution Transtem.

Transtem helps you:

- Reduce operating costs
- Manage program growth
- Reduce risk
- Manage all phases of product development
- Automate compliance
- Increase workflow efficiency
- Access valuable reporting data
- Increase visibility

Transtem was built from the ground up by industry experts to meet the unique challenges of cellular therapy organizations. The solution provides complete operations management by simplifying and automating workflow and manufacturing processes, all within a single Web-based system.

Transtem's unique capabilities centralize donors, cellular products and tissues to provide a 360-degree view of laboratory operations and patient outcomes.

Outfit Yourself with
Transtem™ Cellular Therapy Software by Mediware®

Transtem saves you time, reduces operating costs and improves quality, so you can focus on growing your business.

Transtem helps you:

Streamline Manufacturing

Simplify procedures, from product procurement and identification through processing, storage and release

Lock in Compliance

Meet existing and emerging standards, including ISBT-128-compliant label printing

Track and Analyze

Relate each consumable and equipment usage to individual product manufacturing processes

Automate Quality and Compliance

Centralize training, documents and competencies with KnowledgeTrak™ integration

Manage Product Development

Control all phases, from basic research through clinical trial

Supply Multiple Product Lines

A single system manages all types of regenerative medicine research and protocols
